What Our Members Say About EIM

Sheng Wei | Lawyer @ CKH Law

One of the most undervalued investing and options course in the market! Throughout my EIM journey I learnt how to independently evaluate a company and how to be emotionally prepared for investing. Great work!

Wen Ping | Trainer @ Troffee Education

The past year I have been able to live a flexible and fulfilling life as an educator instead of a 10-to-10 lawyer job without worrying about financials, all because of the investing returns. The best part of EIM is that it provides resources, coaching and a platform to practice company research skills and has a helpful community to support you when you have questions/difficulty.

Yen Wei | Special Projects @ KAF Investment Bank

I've attended investment-related courses where the cumulative amount is easily close to RM20k and I can hereby vouch that this class is very undervalued. It's one of the very few courses where Huan Yang is personally vested and driven to handheld and guide us; providing his insights and keeping us up to date on his finding. The only question you need to ask yourself before attending this is - "Are you as disciplined, committed and eager as Huan Yang to drive results and change in your investment results?" The community is always there to help and support, humble and no ego.
